

VIJAY DINODIA

Aspiring Software Development Engineer — MERN Stack Developer Intern

+91-8854823204 | vijaydinodia548@gmail.com | LinkedIn | GitHub | Portfolio | Jaipur, Rajasthan

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building scalable web applications using **React.js**, **Next.js**, **Node.js**, **Express.js**, and **MongoDB**. Experienced in cloud hosting and deployment on platforms like **Vercel** and **Render**. Strong foundation in **Data Structures and Algorithms**, **Problem Solving**, **REST API Development**, **Authentication & Authorization**, and **Database Design**.

EXPERIENCE

REGex Software Services

Jaipur, Rajasthan

MERN Stack Developer Intern

Feb 2026 – Present

- Developed and maintained full-stack application features using **React.js**, **Next.js**, **Node.js**, **Express.js**, **MongoDB**, and **MySQL**, including database schema design, queries, and efficient data management.
- Designed, developed, and integrated secure **RESTful APIs** for authentication, CRUD operations, data validation, and application-specific business workflows, ensuring seamless **frontend-backend integration**.
- Managed source code and development workflows using **Git/GitHub**, while supporting application deployment and environment configuration across platforms such as **Vercel** and **Render**.

PROJECTS

InterView Flow [Live] [GitHub]

08/2026 – Present

Full-Stack Project — Next.js, Node.js, Express.js, Sequelize, MySQL, Tailwind CSS

- Engineered a live **human-to-human** interview platform pairing candidates with verified industry experts through synchronized **Google Meet** sessions, automatic meeting link generation, and real-time session management.
- Implemented **real-time interviewer filtering** based on target engineering roles, preferred programming languages, and technical specializations, streamlining **candidate-interviewer matching**.
- Developed decoupled service and repository layers using **Sequelize ORM** to efficiently manage business logic, database queries, and scheduling flows.
- Strengthened platform governance by building an **active session auditing** system with one-click remote logout and an integrated **bug-reporting pipeline** to track user issues.

SevaSetu Local Service Marketplace [Live] [GitHub]

06/2026 – 06/2026

MERN Project — React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Nodemailer

- Built a MERN-based local service marketplace connecting customers with service providers through secure booking, provider management, and service workflows.
- Implemented secure **Role-Based Access Control (RBAC)** for **Super Admin**, **Admin**, **Provider**, and **Customer** to manage module-specific operations.
- Developed complete **booking lifecycle management**, category/service management, provider onboarding, and review systems.
- Implemented **JWT authentication**, **bcrypt password hashing**, **MongoDB transactions**, and protected APIs for secure and reliable multi-step operations.
- Integrated **Cloudinary**, **Multer**, and **Nodemailer** for image uploads, automated credential emails, and account workflows.

EDUCATION

University of Rajasthan

Bachelor of Computer Applications (BCA) – Jaipur, Rajasthan

Aug 2022 – June 2025

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript (ES6+), SQL

Core Concepts: Data Structures and Algorithms, Problem Solving, Time & Space Complexity

Frontend: HTML5, CSS3, React.js, Next.js, Redux Toolkit, Tailwind CSS

Backend: Node.js, Express.js, Sequelize, Mongoose

Databases: MongoDB, MySQL, SQL

Cloud & Deployment: Vercel, Render, Netlify

ACHIEVEMENTS & ACTIVITIES

Solved **400+** **LeetCode** problems across various Data Structures and Algorithms topics.

Earned a **3★ SQL Badge** on HackerRank, showcasing proficiency in SQL and database querying.
